COLLEGE FEST 2026

Website Design and Development Project

Theme: Learn • Compete • Celebrate

PROJECT REPORT

A responsive single-page website concept for presenting college fest events, schedule, rules, coordinators, and participant registration.

1. Introduction

College Fest 2026 is a simple and user-friendly website designed to share information about a college festival in one place. The page welcomes visitors with the fest name, theme, date, and venue. It also presents technical events, cultural activities, workshops, the event schedule, participation rules, coordinators, and a registration form. The website is built using HTML for page structure and CSS for styling and responsive layout.

2. Features

- Clear header with the event title and theme.
- Navigation links for Home, Events, Schedule, Rules, and Register.
- Welcome banner displaying the event date and venue.
- Card-based presentation of technical events, cultural events, and workshops.
- Schedule section listing the main activities and their times.
- Rules and coordinator information for participants.
- Registration form with name, email, college name, and event selection fields.
- Purple-themed visual design, spacing, rounded cards, and subtle shadows.
- Responsive CSS media query to improve the layout on smaller screens.

3. Applications

- College and university fest announcements.
- Student club events, department functions, and annual-day programmes.
- Technical symposiums featuring coding, paper presentations, and web-design contests.
- Cultural programmes such as dance, singing, and fashion shows.
- Workshop information pages for topics such as AI, web development, and robotics.
- A central information page that helps students find schedules, rules, and registration details.

4. Future Scope

- Connect the registration form to a backend and database to securely store submissions.
- Add confirmation messages and email notifications after successful registration.
- Provide participant login, registration status, and downloadable entry passes.
- Allow organizers to update event details and schedules through an admin dashboard.
- Add payment integration if any event requires a registration fee.
- Improve accessibility, form validation, and mobile testing across different devices.

- Include event photos, maps, FAQs, and live announcements.

5. Conclusion

The College Fest 2026 website provides a clear digital platform for communicating festival information. Its navigation links help users move between sections, event cards organize activities, and the registration form collects basic participant details. The HTML and CSS implementation is a useful foundation that can later be enhanced with a backend, database, and additional interactive features.

6. HTML and CSS Code

The following is the website source code supplied for the College Fest 2026 project.

```
<!DOCTYPE html>
<html>
<head>
    <title>College Fest 2026</title>

    <style>
        body {
            font-family: Arial, sans-serif;
            margin: 0;
            background-color: #f4f4ff;
        }

        header {
            background-color: #5b3cc4;
            color: white;
            text-align: center;
            padding: 25px;
        }

        nav {
            background-color: #30206e;
            padding: 12px;
            text-align: center;
        }

        nav a {
            color: white;
            text-decoration: none;
            margin: 12px;
        }

        .banner {
            background-color: #ded6ff;
            text-align: center;
            padding: 35px;
        }

        .banner h2 {
            color: #4525a0;
        }

        .container {
            padding: 20px;
            text-align: center;
        }

        .cards {
            display: flex;
            justify-content: center;
            flex-wrap: wrap;
            gap: 20px;
        }

        .card {
            background-color: white;
            width: 220px;
            padding: 18px;
            border-radius: 10px;
            box-shadow: 0 2px 8px #cccccc;
        }

        .card h3 {
            color: #5b3cc4;
        }

        input, select {
            width: 80%;
            padding: 10px;
            margin: 8px;
        }
```

6. HTML and CSS Code (continued — 2)

```
        button {
            background-color: #5b3cc4;
            color: white;
            border: none;
            padding: 12px 25px;
            cursor: pointer;
            border-radius: 5px;
        }

        footer {
            background-color: #30206e;
            color: white;
            text-align: center;
            padding: 15px;
        }

        @media (max-width: 600px) {
            nav a {
                display: inline-block;
                margin: 8px;
            }

            .card {
                width: 85%;
            }
        }
    </style>
</head>

<body>

    <header>
        <h1>■ COLLEGE FEST 2026 ■</h1>
        <p>Learn • Compete • Celebrate</p>
    </header>
